

## Workshop on Blockchain Technologies

IIT Bhilai Innovation and Technology Foundation (IBITF) in collaboration with Infineon Technology Pvt. Ltd organized a one-day workshop on Blockchain Technologies and applications on 27 September 2021. The workshop was conducted in online mode. The topics included: Introduction to Blockchain technology, Critical role of Hardware Security Module for Blockchain security, Infineon's Blockchain Security2Go starter kits, Live demonstration of Blockchain use cases, and Ethereum Blockchain network Demo. The discussions covered various e-governance applications as well as commercial ones. Infineon Technology Pvt. Ltd has further expressed its interest to work in collaboration with selected participants to broaden the scope of this powerful technology. These selected participants may receive seed-grants from IBITF to open start-up companies.
